Fugitive Emission Control Unit

Eliminates harmful emissions from exiting analyzer and GC vents

Product Features

- Eliminates need for flare
- Easily connects to analyzer and GC vents
- Small package (19” high, 3” dia.)
- Ensures no back-pressure on analyzer vents
- Explosion proof packaging for hazardous areas
- Provides stable outlet vent pressure to atmosphere

Product Description

Operation of chemical, refineries, gas processing plants, and pipelines often requires the use of chemical analysis instrumentation. These instruments frequently require a pressure reference to atmospheric pressure for operation. This reference is frequently achieved by venting the sample to the atmosphere. These vented samples, generally called fugitive emissions, are air pollutants and contribute to worldwide pollution problems.

The focus of this technology is the use of a catalytic combustion process to oxidize the vented sample while maintaining the atmospheric pressure reference. The unit utilizes a continuous heat source to allow the oxidation process to be effective on 99% of fugitive emissions. Hydrocarbons are converted to CO2 & water vapor.

The packaging of the system is designed to provide explosion proof protection (Class I Div. I Grp. B, C, & D). This allows application of the technology in hazardous locations.
FLOW RATE
- 1 liter / min (0.035 SCFM maximum OR
- 750 BTU / hour maximum

ANALYTICAL PERFORMANCE
- End product: water vapor, CO2
  (Nil NOx formation due to low temp. operation)
- Backpressure: nil @ 1 liter/min.
  (<0.1” H20 @ 3 liters/min.)
- Catalyst life: >2 years (for preventative
  maintenance we recommend catalyst replacement
  each year of operation to ensure
  efficiency of operation)

PACKAGING
- Electrical class.: Designed for Class 1, Division 1
  Groups B, C, & D; Zone 1 Temp T3B, Ex Group IIB & H2
- Materials of construction: Stainless steel, Aluminum,
  Platinum Catalyst
- Sample inlet connection: 3/4” NPT-F

TEMPERATURE RANGES
- Surface Temp. Class: T6-185°F (T4 - 275° F
  maximum operation)

WEIGHT
- Approx. 10 lbs; 4.5 kg

DIMENSIONS
- 19” X 3” dia.

POWER CONSUMPTION
- PN: Fugitive Emission Control 24
  24 VDC @ 100 watts (max.)
- PN: Fugitive Emission Control 110
  110-120VAC
- PN: Fugitive Emission Control 110
  210-220VAC

Replacement catalyst cartridge PN: T0146-900
